

# Fronts – Kitchen Character

## New Front Smartglas

### Polymerglas-Front matt

Die elegante Polymerglas-Front mit satinmatter Oberfläche bildet mit ihrer gefasteten Außenkante die optische Wirkung von Glas perfekt nach und unterstützt die Tiefenwirkung des Materials. Dabei ist sie stoß-unempfindlich, farb- und formstabil. Durch das AFP Anti-Fingerprint Finish ist sie unempfindlich gegen Fingerabdrücke und reinigungsfreundlich und somit bestens für den Einsatz in der Küche geeignet.

### Polymer glass front matt

The elegant polymer glass front with satin matt surface perfectly imitates the optical effect of glass with its allround thick edging with chamfer and supports the depth effect of the material. At the same time, it is shock-resistant, colour-stable and dimensionally stable. The AFP Anti Finger Print finish makes it resistant to fingerprints and easier to keep surfaces looking their best: an ideal match for the kitchen.

|                                                                                   |                                                                                       |                                                                                         |                                                                                        |                                                                                                      |                                                                                                                                                                  |
